

Field Measure Service Options

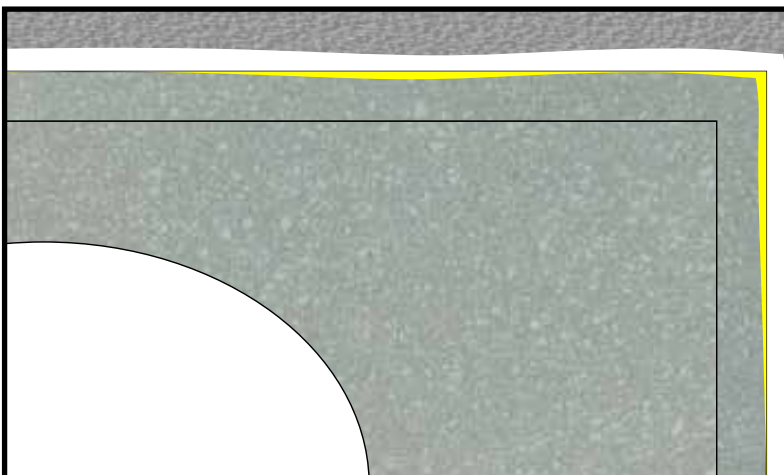

Pre-Scribe

The countertop will be sanded to fit the actual wall (*scribed*). This option is designed for the professional as a labor saver, or for the novice without the tools nor the experience.

Drop in

The countertop will be fabricated to the *smallest* opening of the actual wall. This option allows the countertop to *drop in* without obstruction. This option will leave unsightly gaps behind the countertop and will need to be covered in some fashion by the installer.

Customer Scribe

The countertop will be fabricated to the *largest* opening of the actual wall. Because of this *over sizing*, it is recommended that this option be reserved for the trade professionals. The yellow highlighted area represents the portion of the countertop that will need to be scribed to fit.
